JupyterLab Python 3 (ipykernel)

```
[13]: import nltk
      nltk.download('wordnet')
      from nltk.corpus import wordnet
      word = "teacher"
      synsets = wordnet.synsets(word)
      print("Synsets:")
      print(synsets)
      print("\nExample:")
      print(synsets[0].examples())
      print("\nDefinition:")
      print(synsets[0].definition())
```

[nltk_data] Downloading package wordnet to
[nltk_data] C:\Users\vijay\AppData\Roaming\nltk_data...
[nltk_data] Package wordnet is already up-to-date!

Synsets:
[Synset('teacher.n.01'), Synset('teacher.n.02')]

Example:
[]

Definition:
a person whose occupation is teaching
