[4]: #Create a new list with only the odd numbers

```
print("Create a new list with only the odd numbers")
numbers = list(map(int, input("Enter the integers: ").split()))
odd_numbers = []
for i in numbers:
    if i % 2 != 0:
        odd_numbers.append(i)
print("Odd numbers:", odd_numbers)
```

Create a new list with only the odd numbers
Enter the integers: 50 41 36 85 20 54
Odd numbers: [41]
Odd numbers: [41, 85]

[6]: #Convert a list of integers to a single integer

```
print("Convert a list of integers to a single integers")
numbers = list(map(int, input("Enter the integers: ").split()))
result = ""
for num in numbers:
    result += str(num)
```

Convert a list of integers to a single integers
Enter the integers: 12 34 56 78 90
Single integer: 1234567890
